

Tri International Group (TIG)
Time, Manpower and Money

Introduction

- Running your business in an efficient and cost – effective manner is vital to its success and profitability.
- However, the significant distances between businesses and their Clients that are common in today's global economy can present many challenges.
- TIG provide an effective alternative to sending your own staff.
- TIG enables businesses to gain the benefits of on – site representation while maintaining an efficient and cost – effective business operation.

Background

- Tri international group (TIG) – Egypt is an Egyptian private firm which has a wide experience in international trade, procurement, import & export and company agencies.
- Sister company tri international group – Canada which has a wide experience in international trade & general educational services.
- Management of major programs.
- Market study.
- Barter deal and offset.
- Technical evaluation.
- Technical and price negotiation.
- Us fms guide lines and regulation
- Coo production contracts and programs.
- Shipping, insurance and tax exemption upstream activities including seismic, drilling and pipeline construction management and organization of vehicle production, repair and reconditioning units for all types of vehicles, equipment's and heavy trucks.
- Managing, organizing and controlling of vehicle depots including strong system and continuous supply feasibility studies for industrial activities and production projects.
- Planning of spare parts and material requirements for vehicle repair and services and annual financial scheme.

Benefits

1-Faster Response

From our location in EGYPT, we provide fast, efficient responses, typically in less time than sending your own staff.

2- Accurate, Timely Feedback

As your on – site representation we are your eyes and ears, giving you reliable, real time information ensuring you get the information you need and monitoring recovery plans .

3- Improved Productivity and Efficiency

With your staff not having to leave their normal roles, schedule and planning disruptions are minimized with less distraction your business focus stays on meeting your own customer commitments and milestones

4- Enhanced Information Flow

Face – to – face communication offers a more effective alternative to managing issues by phone, fax and e – mail by facilitating better communication we ensure all parties are working with current information, making scheduling and planning more realistic

5- Ability to Be Proactive

TIG makes it easier to locate, and to head – off issues before they become problems.

6- Follow – Up Visits

Whether we work to an existing schedule / recovery plan, or develop one ourselves, our location makes it both practical and realistic to make regular follow – up visits to monitor and report progress against that plan.

7- Enhanced Cost – Effectiveness

Reduce the cost and disruption to your staff and also make follow – up visits practical and easier to justify.
